ORAL SOLUTION

Rehydratant and improvement of symptoms during heat stress

It is an association of essential electrolytes to restore losses during panting and stress

Contains Betaine, which improves water absorption and hydration. The addition of Eucalyptol and Citrus extracts produce a refreshing effect and mild antiseptic action.

BENEFITS:

- Maintains production parameters during heat stress periods.
- Improves viability of BB chicks.
- Reduces weight loss during transportation.
- Improves weight gain

COMPOSITION

Each ml contains :
Sodium (Na+) 8 mg
Potassium (K+) 50 mg
Magnesium (Mg ++) 18 mg
Vitamin C 30 mg
Eucalyptol and Citrus 50 mg
Betaine 50 mg and excipients

DOSAGE

The administration in the drinking water allows a quick response to the alteration of electrolytes.
Recommended dosage 1 L of **ELECTRO C**/1000 L of drinking water. Administer during 2-5 days.

PRESENTATION

1 and 5 liters.
