

# SAFE ZYME PLUS

## MULTI ENZYME FEED GRADE POWDER

**Composition:** Each gm contains:

Cellulase	: 10000 IU
Xylanase	: 6000 IU
Beta Glucanase	: 700 IU
Alfa Amylase	: 700 IU
Protease	: 3000 IU
Pectinase	: 70 IU
Lipase	: 5 IU
Phytase	: 1300 IU
Carrier	: Good flavored herbs.

**Cellulase:** It contribute in better digestion of plant based feeds.

**Xylanase:** It eliminates anti-nutrient factors from the animal feed & enhances the digestibility, which increases the utilization of unconventional feedstuffs, reduces feed costs & improves feed efficiency.

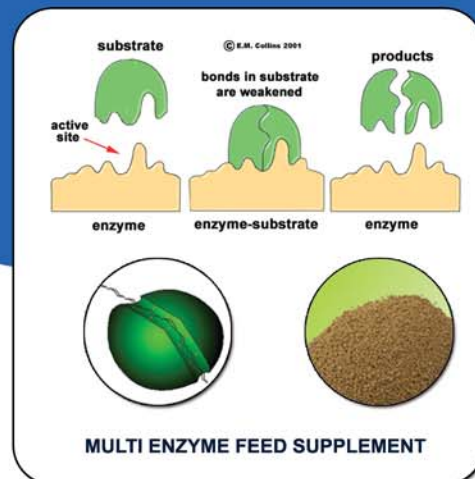

**Beta Glucanase:** It enhances the digestibility of plant based animal feeds by breaking down the glucans present in the feed.

**Alfa Amylase:** It breakdowns the plant based starches present in food & converts into the sugar.

**Protease:** It breakdowns/hydrolyzes peptide bonds present in the proteins & helpful for the protein digestion, also helpful for the blood clotting & proper functions of the immune system.

**Pectinase:** It degrades the pectin in plant tissues & then releases the nutrients such as proteins & polysaccharides.

**Lipase:** It catalyze Lipid hydrolyzation & facilitate animal digestion & absorptions of nutrients, it increasing FCR & economic benefit.

### Benefits:

- It improves FCR & digestion.
- It improves feed utilization & nutrient absorption available in the feed.
- It improves the body weight in broilers.
- It optimizes egg production in layers.
- It improves general health & immunity of the birds.
- It prevents & controls loose droppings.
- It improves the individual performance in poultry birds.

### Dosage:

Poultry feed: 300-350 gm/ ton of feed (or) as advised by a veterinarian.

**Presentation:** 25 kg drum.
