

ORGAVIT-PREMIX-M

Trace Minerals Concentrate

Composition: Each kg Contains:

Manganese	: 45 gm
Zinc	: 42 gm
Iron	: 42 gm
Cobalt	: 375 mg
Copper	: 4500 mg
Iodine	: 750 mg
Selenium	: 75 mg
Elemental Chromium	: 150 mg.

Manganese (60 gm/kg): It plays a significant role in the chicken's body in the formation of chondroitin sulfate, which is an important component of bone cartilage. Deficiencies of manganese causes perosis, bone shortening in growers.

Zinc (55 gm/kg): It plays an important role in growers. Zinc deficiency in growers causes immuno suppression, poor feathering, dermatitis, infertility etc.

Iron (55 gm/kg): It is essential mineral in the blood hemoglobin

Cobalt (500 mg/kg): It helps to tone up the cells & develop the sexual organ especially ovary functions.

Copper (6000 mg/kg): It is required for bone development, joint cartilage, connective tissues. It helps for uptake & utilization of iron.

Iodine (1000 mg/kg): It is an essential element used by the thyroid for the biosynthesis of thyroid hormones, through these hormones, iodine is involved in controlling metabolism, cell growth, maturation & development of tissues.

Selenium (100 mg/kg): It plays an important role in prevention of exudative diathesis, normal pancreatic function and fertility.

Elemental Chromium(0.2 gm/kg): Improves reproductive functions & also helps to improve glucose intake.

Benefits in POULTRY:

“ORGAVIT-PREMIX-M” PREVENTS

1. Loose shell & broken eggs.
2. Leg weakness & lameness.
3. Poor feathering.
4. Poor hatchability.
5. Poor growth.
6. Perosis.

“ORGAVIT-PREMIX-M” IMPROVES

1. Egg production.
2. Meat quality & quantity.
3. Growth & body weights.
4. General health & activeness.
5. Disease resistance etc.

Benefits in FISHERIES:

1. Improves the bone & muscle strength.
2. Corrects the deficiency symptoms of minerals.
3. Increases growth & body weight
4. Improves disease resistance power.

Dosage : POULTRY:

Regular use : 1 kg. / ton of feed.
During deficiency : 2 kg. / ton of feed.
Breeders: 2 kg. / ton of feed.
Broiler feed : 1.5 kg / ton

FISHERIES :

Regular use: 2 kg. / ton of feed.
During deficiency : 5 kg. / ton of feed.
(or) as advised by a veterinarian.

Presentation: 10 kg bag.
